Biodiversity & Wine Initiative

South Africa's winemakers are passionate people, inspired not just by the drive to produce premium quality wines but also by their role as custodians of the unique landscape which gives life to these distinctive wines.

Over 95% of our wine is produced in the area known as the **Cape Floral Kingdom**. One of six such plant kingdoms in the world, it is the smallest and the richest, with 70% of the plants found here, not found anywhere else on earth. To help protect the world's most beautiful, biodiverse winelands an ambitious partnership was formed between conservation bodies and the wine industry.

Today, thanks to the *WWF Biodiversity and Wine Initiative (BWI)* South African wines lead the world in production integrity and environmental sustainability.

Now South Africa's discerning wine drinker can show their commitment to this important work by selecting wine made by BWI Champion and Member farms.

You too can play a role in protecting this precious natural heritage – choose wines with the BWI sticker or from BWI accredited farms on this list.
